Software Projects

Lee's Picture Framing: Website

A static website I designed and built for a local picture framing store. I challenged myself to build this product using npm scripts, selecting the necessary build tools and dev dependencies myself. I designed the website using Figma, and deployed the final product using the Netlify services.

Drop the Needle: Web Application

Online music magazine, Single page application built with react, utilizes React router, React hooks and a responsive design.

Home Page: Web Application

A landing page designed for Chrome. This application was built using React and features API calls, customizable design and a pomodoro timer.

Professional Experience

Sales Assistant/ Assistant Manager @ Lee's Picture Framing
Dec 2013 - May 2019 // Dandenong, VIC

Lee's Picture Framing is a small business, specialising in the manufacturing and sales of photo frames across two stores in Melbourne.

- Engaged and interacted with customers to create positive shopping experiences and drive revenue growth.
- Delivered positive results by controlling monthly operations budget and limiting financial discrepancies.

Games Operator @ Crown Casino and Entertainment Complex
Mar 2016 - Oct 2018 // Southbank, VIC

Crown Casino and Resorts is the largest entertainment complex in the southern hemisphere, located in Melbourne's lively Southbank precinct.

- Assessed and calculated multiple players' cards against competitors and house hands to determine round or game results, winners, correct wagers, and rotation of play.
